

Privacy Policy

Last updated: September 14, 2026

This Privacy Policy describes how this ChatGPT plugin (the "Plugin") handles information when made available through ChatGPT and other services operated by OpenAI. The Plugin is independently developed and is not an official OpenAI product unless expressly stated otherwise by OpenAI.

1. General Privacy Principle

The Plugin is designed to collect and process only the minimum amount of information reasonably necessary to provide its functionality.

The developer does not sell, rent, trade, or otherwise monetize users' personal information.

Unless explicitly disclosed to the user, the Plugin does not intentionally retain personal information beyond what is reasonably necessary to operate the Plugin, comply with applicable law, maintain security, or resolve technical issues.

2. Information Processed Through OpenAI

Users interact with the Plugin through ChatGPT or other OpenAI services.

Information submitted through ChatGPT may therefore be processed by OpenAI in accordance with OpenAI's own terms, privacy policies, data controls, and other applicable policies.

OpenAI's processing of information is governed exclusively by the agreement between OpenAI and the relevant user or organization.

The developer does not control OpenAI's independent processing, storage, retention, or use of information within OpenAI's services.

Users should consult OpenAI's Privacy Policy and applicable terms for information regarding OpenAI's data practices.

3. Information Processed by the Plugin

When necessary for the Plugin to perform a requested function, information supplied through ChatGPT may be transmitted to infrastructure used to operate the Plugin.

Only information reasonably necessary to fulfill the user's request should be processed.

The developer does not intentionally request or collect sensitive personal information unless such processing is expressly disclosed, necessary for the functionality requested by the user, permitted by OpenAI policies, and allowed under applicable law.

Where technical logs are generated for security, reliability, abuse prevention, or debugging purposes, they may contain limited technical information. Such information will be retained only for as long as reasonably necessary for those purposes.

4. No Sale or Advertising Use of Personal Data

Personal information received through the Plugin is not sold.

Personal information received through the Plugin is not used for targeted advertising, behavioral advertising, or the creation of advertising profiles.

The Plugin does not provide users' personal information to data brokers.

5. OpenAI Intellectual Property and Ownership

All rights, title, and interest in and to OpenAI, ChatGPT, OpenAI models, OpenAI APIs, OpenAI SDKs, OpenAI developer tools, OpenAI software, technologies, services, documentation, trademarks, trade names, logos, icons,

designs, branding, and any other materials owned, controlled, or otherwise reserved by OpenAI or its affiliates remain exclusively with OpenAI and its respective licensors.

The developer makes no claim of ownership whatsoever over any intellectual property, technology, service, material, trademark, content, right, or other asset that belongs to, is controlled by, or is otherwise reserved to OpenAI.

Nothing in the publication, distribution, operation, or availability of this Plugin shall be interpreted as transferring to the developer any ownership interest in OpenAI, its services, technologies, intellectual property, trademarks, models, APIs, software, documentation, or other assets.

Any rights granted by OpenAI to the developer are limited strictly to those rights expressly granted under OpenAI's applicable terms, policies, licenses, documentation, and developer agreements.

All goodwill arising from the permitted use of OpenAI names, trademarks, logos, or other OpenAI brand assets belongs exclusively to OpenAI.

The developer expressly disclaims any ownership claim or proprietary interest in OpenAI intellectual property.

6. No Claim Over OpenAI Services or User Relationship

The developer does not claim ownership of ChatGPT, OpenAI services, or the relationship between OpenAI and its users.

Users' use of ChatGPT and other OpenAI services remains governed by the applicable agreements between those users and OpenAI.

Nothing in this Privacy Policy modifies, replaces, limits, overrides, or supersedes any OpenAI terms, policies, licenses, privacy notices, developer requirements, or other agreements.

In the event of any inconsistency between this Privacy Policy and mandatory OpenAI requirements concerning OpenAI's services or intellectual property, the applicable OpenAI terms and policies shall control to the extent permitted by law.

7. No OpenAI Endorsement

The availability of this Plugin through ChatGPT does not, by itself, imply that OpenAI created, sponsors, endorses, certifies, operates, or assumes responsibility for the Plugin.

The developer operates independently from OpenAI unless OpenAI expressly states otherwise.

8. Third-Party Services

If the Plugin relies upon third-party infrastructure or services, those providers may process limited information necessary to provide their services.

Where applicable, such processing is subject to the relevant provider's privacy terms and applicable data protection law.

The developer endeavors to use only services reasonably necessary for the operation, security, and reliability of the Plugin.

9. Data Retention

Personal information processed directly by the Plugin, if any, will not be retained longer than reasonably necessary for the purposes for which it was processed, except where longer retention is required by law, security obligations, dispute resolution, or enforcement of applicable agreements.

10. Security

Reasonable technical and organizational measures are used to protect information processed by the Plugin against unauthorized access, disclosure, alteration, loss, or misuse.

However, no internet-connected system can guarantee absolute security.

11. User Rights

Depending on the user's jurisdiction, users may have rights regarding their personal information, including rights of access, correction, deletion, restriction, objection, or portability.

Requests concerning information processed independently by OpenAI should be directed to OpenAI through its privacy controls and procedures.

Requests concerning information processed directly by the Plugin may be submitted using the developer contact information provided with the Plugin listing.

12. Children

The Plugin is not intended to independently collect personal information from children in violation of applicable law or OpenAI policies.

13. Changes to This Policy

This Privacy Policy may be updated from time to time to reflect changes to the Plugin, applicable law, OpenAI requirements, or data-processing practices.

The 'Last updated' date at the top of this Policy indicates the latest revision.

14. Contact

Questions or requests concerning this Privacy Policy may be directed to the developer using the contact information provided on the Plugin's official listing or website.

OpenAI Rights Reservation

For the avoidance of doubt: Any and all rights, intellectual property, technology, branding, services, materials, or other interests that belong to OpenAI, are controlled by OpenAI, or may lawfully be reserved by OpenAI remain the sole property of OpenAI or its applicable licensors. The developer asserts no ownership, proprietary right, partnership interest, entitlement, or other claim over them.

Nothing contained in this Privacy Policy is intended to restrict, appropriate, challenge, or otherwise interfere with any right belonging to OpenAI.

This document should be read together with the applicable OpenAI terms and policies.
